Allowable Subject Matter

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not). Misnumbered claim 12 has been renumbered 11.

2. Claims 1 – 11 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims 1 –11 are allowable over the prior art of record since the cited references taken individually or in combination fail to teach or fairly suggest the steps of "simulating the classes of traffic to determine one or more QoS mechanisms for configuring the nodes such that the identified criteria are satisfied" and "determining multiplexing gains of the classes of traffic in the links based on the simulated classes of traffic" as recited in claim 1. It is noted that the closest prior art, Yin et al. (US Patent No. 6,442,138) shows a method of identifying traffic parameters and class of service and determining QoS parameters associated with the requested connection in Figures 2 and 3, column 5.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert T. Chou whose telephone number is 571-272-6045. The examiner can normally be reached on 8:30 - 17:00.

Art Unit: 2662

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizooou can be reached on 571-272-3088. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
